

ACADEMIC DETAILS			
B.Tech AI & MACHINE LEARNING	Bapatla Women's Engineering College, Bapatla	81 %	2025
Andhra Pradesh Board of Intermediate Education (BIEAP) (CLASS XII)	DKNP junior college	781 MARKS	2021
Andhra Pradesh Board of Secondary Education (BSEAP) (CLASS X)	Sri vignan high school	9.3 CGPA	2019
SUBJECTS			
Electives	Artificial Neural Networks		
Technical Proficiency	MySQL, Python, C++, HTML + CSS, Java, Data Visualization, WordPress, JavaScript, PHP, Power BI, C Programming, Artificial Intelligence		
WORK EXPERIENCE			
supraja technologies intern	<ul style="list-style-type: none"> - Completed an internship at Supraja Technologies, Vijayawada, as an Ethical Hacker, honing skills in vulnerability assessment and penetration testing. - Conducted thorough risk assessments and identified potential security threats to enhance the company's digital infrastructure. - Utilized tools like [list specific tools, e.g., Nmap, Burp Suite] to simulate cyber-attacks and developed mitigation strategies. - Collaborated with the development team to implement secure coding practices and remediate vulnerabilities. - Gained expertise in compliance and regulatory requirements, ensuring adherence to industry standards. 	Jun 2024 - Aug 2024	
Elewayte intern	<ul style="list-style-type: none"> - Completed an internship in Artificial Intelligence at Elewayte, expanding knowledge in machine learning, deep learning, and natural language processing. - Developed and trained AI models using [list specific tools/libraries, e.g., TensorFlow, PyTorch] to solve real-world problems. - Worked on dataset analysis, data preprocessing, and feature engineering to improve model accuracy. - Explored computer vision and image processing techniques, applying algorithms for image classification and object detection. - Collaborated with mentors to design and implement AI-powered solutions for [specific applications, e.g., chatbots, predictive analytics]. 	Nov 2023 - Jan 2024	
intrenshala intern	<ul style="list-style-type: none"> - Completed an internship in Web Development at Internshala, gaining hands-on experience in building scalable and efficient web applications. - Developed dynamic web pages using HTML, CSS, JavaScript, and frameworks like [list specific frameworks, e.g., React, Angular]. - Designed and implemented databases using MySQL/MongoDB to store and manage data. - Implemented front-end and back-end integration using APIs and RESTful services. - Collaborated with mentors to resolve bugs, optimize code, and enhance user experience. <p>To make it more impactful, consider adding specific projects or achievements, such as:</p>	Mar 2023 - Jun 2023	
PROJECTS			
	Created an automated alert system with Google Apps Script that scans the Gmail inbox for		

Email Alerts on WhatsApp by Twilio	<p>incoming emails and provides real-time WhatsApp notifications through Twilio API. The script fetches the subject, sender, and timestamp of the latest email, converts it into a readable message, and sends it to the recipient's WhatsApp number. The system utilizes Google Workspace services (GmailApp, ScriptApp, UrlFetchApp) and Twilio's REST API, allowing for easy cross-platform communication. Established time-based triggers for timed email checks and also incorporated error handling and logging for stable performance.</p>	Jan 2024 - May 2024		
EXTRA-CURRICULAR ACTIVITIES				
freelancing	I am a freelancer web developer, providing web development services to clients.			
Running	I participated in Running competition from my school in 100 meters and 200 meters. And I got gold medal in both division and district level.			
LANGUAGES				
English, Telugu
